

- **Renewable technology that works day & night**
Provides whisper quiet power in common wind speeds starting at 5 mph.
- **Flexible power**
Can be grid-tied to lessen impact of high energy costs. When combined with storage will provide reliable off-grid power.
- **Easy to ship and easy to install**
A breeze to assemble with Primo's unique cantilevered design and small foundation. Easy to put up and take down for service or extreme weather.
- **An intelligent solution**
Use to power a variety of technologies including WiFi, 5G small cells, security cameras, and weather stations.
- **Disaster relief ready**
Excellent for remote power or disaster situations where power has been interrupted or destroyed.
- **Power from nature**
Blends seamlessly into any environment. Common plantings for the EnergiTree include off-grid homes, resorts, parks, camp grounds, farms, parking lots, etc.

harvesting both the force
of the wind and the
power of the sun

TECHNICAL SPECIFICATIONS

Model:	EnergiTree
Rotor Diameter:	72 inch
Net Weight:	300 lbs
Wind:	Patented torque design
Solar:	25 year warranty
Total Rated Power:	2.4 kW energy platform
Batteries:	2 carbon-based AGM batteries
Electronics:	MPPT controllers UL-certified, all plug & play

FEATURES & BENEFITS

- Hybrid wind and solar for most consistent power supply
- Proprietary torque generator
- Housing completely seals/protects against dust and moisture to IP 66 and IP 67 standards
- Silent operation
- The cantilevered pole design makes for easy installation, servicing, and lowering in times of extreme weather

2.4 kW
of energy
